

The Power of Projection

The arena built at Akwesasne was beautiful...
The sound wasn't.

With extra high ceilings and sound reflecting surfaces everywhere, the arena was an acoustic nightmare. Two previously installed systems had proven unsatisfactory when contractor Anthony Lawson & Associates called and suggested a system using KDM's Octasound speakers and KDM MX120A mixers. The result — problem solved!

"We are totally satisfied with our new KDM Sound System, especially considering the previous problems we had in addressing our acoustically difficult facility."
